Revision Date:
07/01/2026

Background:
The Income and Eligibility Verification System (IEVS) is a computerized information system that performs data matches against several state and federal agency databases to verify certain types of income and/or property. The IEVS system consists of the following data matches:

- Applicant IEVS (A-IEVS)
- Recipient IEVS (R-IEVS)
  - Beneficiary Earnings Exchange Record (BEER)
  - Franchise Tax Board (FTB)
  - Integrated Fraud Detection (IFD)/Earning Clearance System (ECS) Match
  - Internal Revenue Service (IRS) Asset Match System
  - Payment Verification System (PVS)
  - California Youth Authority (CYA)
  - Deceased Persons Match (DPM)
  - Fleeing Felon Match (FFM)
  - New Hire Registry (NHR)
  - Nationwide Prisoner Match (NPM)
  - California (CA) Lottery Match

Purpose:
This section describes the IEVS system, and how it is used in the CalFresh eligibility determination. This section is being updated to include information about the California Lottery Match.

Policy:
All IEVS data matches listed above except for PVS, IRS, IFD, and BEER must be processed at application and recertification. IRS, IFD, BEER, and CA Lottery matches are processed by Quality & Eligibility Support Department (QESD) staff. PVS matches contain information that is considered Verified Upon Receipt (VUR) and must be processed upon receipt.

When processing matches staff must compare the information to the case record to assist with the determination of eligibility and benefit levels. A-IEVS data must be requested no later than five days after the initial interview and at least 15 days prior to the recertification interview. If the IEVS data is received during the application process, the information must be used in determining eligibility. The granting of benefits must not be delayed waiting for the IEVS data when other information establishes eligibility.

The following resources are available to assist with the processing of IEVS matches:

- IEVS Processing Guide 118-01
- Eligibility Policy and Procedures Guide (EPPG) The Work Number (TWN)

1. Timely Processing of IEVS

Potential discrepancies are considered “Discovered/Identified” on the “run date” or “date of receipt” of the IEVS match, whichever is later. Follow up on IEVS data must be completed within 45 days from the date the data is received, except for CYA, DPM, FFM, and NPM matches. If a potential

discrepancy exists, a request for information must be mailed to the customer within 45 days of receipt of the IEVS match, to meet timely processing requirements.

R-IEVS matches received on closed cases must be processed within 12 months from the run date or the date of receipt, whichever is later. Any R-IEVS match received on a closed case beyond 12 months must be dispositioned as no impact. All actions taken must be documented in the case record.

2. Verification
All IEVS information must be independently verified before any case action can be taken except for the PVS data match and CA Lottery Winnings, which are considered VUR. Customers must be given the first opportunity to verify the discrepancy. If necessary, assist the customer to obtain the required information. If the household fails or refuses to respond with sufficient information to clear the discrepancy, an appropriate third-party payroll source such as TWN must be used to resolve IEVS discrepancies. Third-party payroll sources such as TWN, will be considered appropriate income sources for the purpose of verifying IEVS discrepancies. If the employer is not associated with a third-party payroll source, then the employer must be contacted.

If an appropriate third-party payroll source such as TWN provides information beyond what was reported in an IEVS match showing a missed mandatory report over Income Reporting Threshold (IRT), an attempt must be made to verify the discrepancy by sending a verification letter to the household. If the household fails or refuses to respond with sufficient information to clear the discrepancy, the income reported by TWN/Third-party payroll source will be considered as verified and will be used to determine eligibility. Any overissuance (OI) must be assessed based on mandatory reporting rules for the months the customer failed to report income over their IRT. If TWN/Third-party payroll source shows current income, determine if the income affects current benefit levels.
