Beginning Date of Aid	Number	Page
	44-300.C	1 of 3

Revision Date:
November 1, 2023

Background:
The Beginning Date of Aid (BDA) regulation is followed when granting an application for assistance. The BDA may vary for Assistance Unit (AU) members. The BDA cannot precede the date of application.

Purpose:
The purpose of this revision is for sunset review and to reformat the section to current standards. The section is also being renumbered from 44-300.F to 44-300.C. CalWORKs Program Guide (CPG) section 44-300.F Maximum Family Grant (MFG) is now obsolete and removed from the CPG. There is no policy change to BDA with this revision.

Policy:
BDA for New Applications
The BDA for new applications is the date of application or the date the customer meets all conditions of eligibility, whichever is later. The date of application means the date the county receives a signed and dated application. The date the application meets all eligibility conditions means the date all linking and non-linking factors of eligibility are met, even when the required verification of the condition is received at a later date. Examples of the linking and non-linking factors are deprivation, age, citizenship, non-citizen status, residence, property, and income.

Technical conditions of eligibility met at a later date are considered to be met on the application date when they are completed by the date of approval except for the verification of, or application for, a Social Security Number (SSN). The customer must provide the SSN or proof of application for SSN within 30 days following the application date. Refer to CPG 40-100.B for the list of all technical conditions for CalWORKs.

When the BDA is after the first of the month, the amount of aid will be prorated. When a case was erroneously denied, the denial action is to be rescinded and the BDA will be the date the AU would have been eligible in accordance with the BDA regulation. In addition, retroactive corrective payments will be made to the family member when aid is not paid in accordance with the BDA regulations or when an application was erroneously denied.

For example, a family applies for CalWORKs on November 10. All family members meet the eligibility requirements except for the youngest child who does not have a SSN. On November 20, aid was granted for everyone except the one child because verification of a completed SSN application has not been provided. On December 2, the county receives proof of an application for a SSN. The denial for the child will be rescinded and the BDA for the child is November 10.

BDA for Person Being Added to the AU
The BDA for persons being added to the AU will be based on Semi-Annual Reporting (SAR) or Annual Reporting/Child Only (AR/CO) regulations and the impact to the grant amount will be considered.

When a mandatorily included person being added to the AU results in:

- Increase of grant – The BDA will be the first of the month after the change is reported and all conditions of eligibility have been met.
- Decrease of grant for SAR household – the BDA will be the first day of the SAR Payment Period following the required reporting of the customer on the SAR 7 and all conditions of eligibility have been met.
- Decrease of grant for AR/CO household – The BDA will be the first month following the month in which the change occurred.

When a mandatory AU member is unreported, the BDA is the date the person meets all requirements for eligibility when they are required to be included in the AU. Eligibility conditions are considered to have been met from the first day of the month following the date the person was discovered in the home, providing the person is cooperating in meeting the eligibility conditions.

When an optional person being added to the AU results in:

- Increase of grant – The BDA will be the first of the month after the change is reported and all conditions of eligibility have been met.
- Decrease of grant for SAR household – the BDA will be the first day of the SAR Payment Period following the required reporting of the customer on the SAR 7 and all conditions of eligibility have been met.
- Decrease of grant for AR/CO household – The BDA will be the first month following the month in which the change occurred.

The BDA for a person who was sanctioned will be the first of the month following the date the customer contacted the county to indicate their desire to cure the sanction after all the following conditions are met:

- All conditions of eligibility.
- The customer completed the necessary action to cure their Employment Services sanction by successfully completing the activities that resulted in the sanction, or another valid activity determined by the Employment Case Manager (ECM).

Refer to CPG section 10-025.A – Employment Services Noncompliance and Sanctions for more information and refer to CalWORKs Processing Guide 10-025.A4 for example scenarios.

When a newborn child being added to the AU results in:

- Increase of grant for SAR household – The BDA will be the first of the month after the birth is reported and all conditions of eligibility have been met.
- Decrease of grant for SAR household – The BDA will be the first day of the next SAR Payment Period after the change is reported on the SAR 7 and all conditions of eligibility have been met.
- Increase of grant for AR/CO household – The BDA will be the first of the month after the birth is reported and all conditions of eligibility have been met.
- Decrease of grant for AR/CO household – The BDA will be the first of the month after the birth is reported and all conditions of eligibility have been met.

When the second parent of a newborn being added to the AU results in:

- Increase of grant – The BDA will be the first of the month after the report of the birth and all conditions of eligibility have been met.
- Decrease of grant for SAR household – The BDA will be the first day of the next SAR Payment Period after the report of the birth and all conditions of eligibility have been met.

Note: There are instances when the second parent and the newborn will be added to the Pregnant Person Only (PPO) case separately. The newborn can be added to the AU prior to the second parent when adding the second parent (of a newborn) results in a decrease of the grant.

Program Impacts:

Medi-Cal

When a customer receiving Medi-Cal requests CalWORKs, the customer must submit a CalWORKs application. The BDA is whichever of the following is later: the first of the month of application, or the first of the month in which the customer meets all CalWORKs conditions of eligibility.

General Relief

The BDA regulations will be followed when a customer receiving General Relief benefits applies for CalWORKs. The customer may receive CalWORKs benefits in the same month they receive General Relief when the customer meets all CalWORKs conditions of eligibility. Refer to CPG 44-100.C for information on how the General Relief income will be treated in the CalWORKs budget.
