Medi-Cal Eligibility Data System (MEDS) Alerts	Number	Page
	20.03	1 of 3

Revision Date:
May 1, 2025

Background:
State law requires that counties process Medi-Cal Eligibility Data System (MEDS) alerts timely. The Department of Health Care Services (DHCS) monitors specific alerts for performance standards through reports from the California Automated Welfare System (CalSAWS).

Purpose:
To provide the categorization and list of MEDS alerts that are monitored by DHCS as part of performance standards.

Policy:
A. Performance Standard
- 90% of non-reconciliation MEDS alerts should be processed timely.
- 95% of reconciliation MEDS alerts should be processed timely.

B. Timely Processing
To be considered timely, MEDS alerts received:
- On or before the tenth working day of the month must be processed in time for the change to be effective the beginning of the following month.
- After the tenth working day of the month must be processed in time for the change to be effective the beginning of the month after the following month.

C. Alert Categories
DHCS separates the monitored MEDS alerts into the following categories:
- Category 1: Most frequently generated that impact eligibility or share of cost (SOC).
- Category 2: Impact to active or on hold records, or those active in programs such as Accelerated Enrollment (AE) and Presumptive Eligibility (PE).
- Category 3: Impact to eligibility or SOC with less negative impact than the alerts in Category 1.

Procedure:

Eligibility staff must:

- Review the alert and take appropriate action in CalSAWS and/or MEDS.
- Clear the alert in the CalSAWS MEDS Alert Search Results Summary page.
- Review MEDS alerts when processing changes and resolve them within the timelines specified above.

Guides for resolving critical MEDS alerts can be found in Eligibility Essentials.

A listing of the monitored alerts for each office is updated weekly and can be found on the county Management Reports SharePoint under weekly reports. Use the report to track timely resolution of monitored alerts.
